

KUFU Installation Template, How-To guide.

Version: 01

VEHICLE REFERENCE:

The KUFU Installation Template is a fold-out template to guide Installers through the process of drilling accurate holes into a vehicle floor.

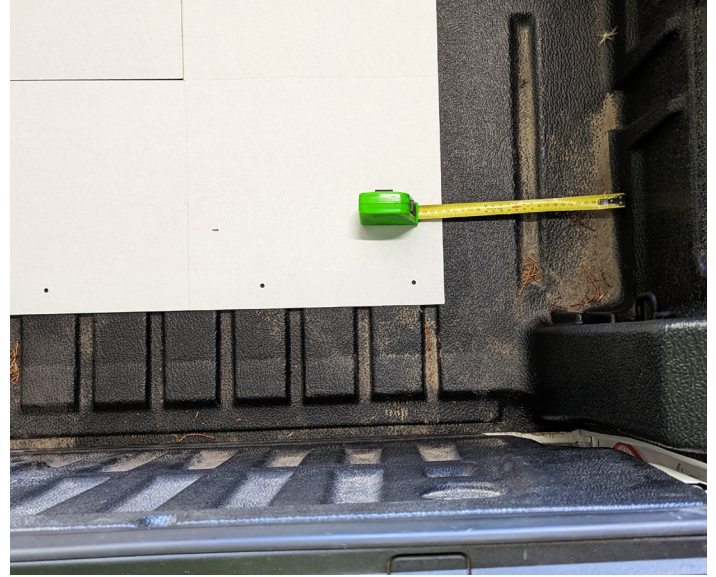

It is suitable for Ute and Truck Tubs as well as Van Floors and Tray Tops.

STEP 1 - Layout:

Carefully unfold and position the Template into the workspace.

**STEP 2 - Tailgate Distance:**

Measure from the tailgate edge, refer to the vehicle specific Install Manual for details.

**STEP 3 - Centred:**

Measure from the sides to ensure the Template is centrally positioned, and parallel to the tailgate edge.

**STEP 3 - Mark Hole Positions:**

Secure the template with tape and mark the holes to be drilled.

Always check before drilling.

STEP 5 - Carefully fold the Template for re-use AND refer to the vehicle specific Instruction Manual for more detail.

Always check before drilling to prevent damage to critical vehicle components.

**Template Hole Types:**

Round Holes in the Template refer to a TYPE A installations.

Hexagonal Holes in the Template refer to a TYPE B installations.
